The works of an author like Scott cannot be too extensively discussed. No one can come from a personal study of his writings without being impressed with the grandeur and magnificence of his style. It has been well observed by an able and eminent American critic, that "If ever writer deserved universal citizenship, it was Sir Walter Scott." He was the Poet of Nature, the delineator of his species in every climate and on every soil; so that wherever his works were known, there was he to be regarded as a master and a genius.

The illustrations consist of SEVEN SUPERB STEEL PLATE ENGRAVINGS, besides numerous engravings, on wood and stone, of the best AMERICAN RESIDENCES AND PARKS, with Portraits of many new or remarkable Trees and Shrubs.
